A NEWSLETTER FOR THE EMPLOYEES OF BROADWAY SERVICES, INC. / FEB, MAR, APR 2020

HEROES

THANK YOU TO ALL OF OUR EMPLOYEES!
You are our UNSUNG HEROES. You make the difference. We value and appreciate your efforts reporting to work daily during the COVID-19 worldwide pandemic.

PRESIDENT'S MESSAGE – APRIL 2020

We are facing extremely challenging times during this COVID-19 world health crisis. We could never have imagined this, and we have never needed to be committed to one another and our well-being more than we have at this time.

Here at Broadway we have tried to keep you all informed with a bi-weekly memo that addresses the “essentials” of proper procedures and careful precautions about which we all must be aware. We have relied heavily on Johns Hopkins Medicine and the CDC for accurate information and prudent guidance for all of you. We are grateful to the many professionals in the field who continue to give us sound advice and who strive to get all of us through this ordeal as healthy as possible. We are thankful to have Governor Hogan leading us through this time as Marylanders. He has been right in front of this from day one, and his warm and calm demeanor speak volumes about the quality of this official. Some of our other heroes are the medical professionals caring for us, the drivers who bring goods to our food stores and pharmacies, the workers in those stores, our mail carriers and delivery people, and you who provide essential services. We are most grateful to those of you still out there, working every day to see to it that people are safe, that venues are as clean and free of germs as they can be, that both people and cargo get to their intended destinations safely, and that properties and garages we serve are maintained. This is a time for stepping up and for taking care of ourselves and others, and so many of you are doing just that. Thank you all for your service.

It is our intention at Broadway to do whatever we reasonably can to soften the negative economic impact of this time for as many as we can. Having said that, we also know we

cannot maintain a full work force in the midst of such an economic turndown, it is just not feasible. We will continue to provide you with the help that we can in Human Resources to navigate these times with the least difficulty possible. Please know we genuinely want what is best for you, and we will work hard to achieve that.

I read a quote in an email the other day which has stuck with me, “A physician once said, ‘The best medicine for humans is love.’ Someone asked, ‘What if that doesn’t work.’ The doctor smiled and replied, ‘Increase the dose!’” That’s it in a nutshell. As we live through this time, let us commit to what one doctor calls the basics:

- reach out
- stay connected
- stay home when sick
- save lives
- spread the word and not the virus.

Be well and stay safe!

Sincerely,

Peter Seidl, President

GOING ABOVE AND BEYOND...

I wanted to let you know that Darniece Johnson, Janitor, Johns Hopkins Bayview Credit Union, went above and beyond for us on Friday, 4/3. She was outside, cleaning the ATM area, when a car broke down in the teller lane. She helped the man push his car to an area that would still allow other cars to be waited on.

The Credit Union thanked her by getting her a bouquet of cookies.

TIPS FROM BSI TO YOU: ADVICE FROM OUR BSI TEAM

Carpet Cleaning

Dirt and germs that accumulate in carpeting will accelerate wear and reduce office cleanliness. There are simple ways you can protect your carpet investment, including daily vacuuming, regular deep cleaning, and the implementation of matting programs.

Here are 5 tips to improve your Commercial Carpet Cleaning:

1. Understand the difference between stains and spots

The only difference between a spot and a stain is time. You should immediately blot (never wipe or rub!) the affected area with a paper towel to absorb as much of the spill as possible.

2. Pre-spray cleaning solutions onto the carpet to remove spots

Improperly done, carpet cleaning chemicals can leave behind sticky

residues that actually collect more dirt, leaving carpets dingy over time. Generally, only properly diluted chemicals that break down oily, sticky dirt stains and rinse clean from the carpet should be used for spotting. Just like in Example 1, time makes a difference. Allow your pre-spray to penetrate the spot for a few minutes to work most effectively.

3. Choose the best equipment selection for the job

Routine cleaning, such as daily vacuuming with high quality equipment, can vastly reduce your need for deep cleaning. Correctly executing on your periodic deep carpet extraction cleaning is essential to keep carpets dry, preventing mold growth.

4. Pre-vacuum before cleaning to remove dry soil from the carpet

Vacuum carpeted areas daily. Dirt is easily removed if addressed in a timely fashion, but once dirt gets wet

it can become deeply embedded in the carpet. Pre-vacuuming allows regularly deep cleaning through extraction to work more effectively and improve productivity as well.

5. Train on how to effectively clean carpets

When cleaning carpet learn first—then clean. The easiest way to make sure your carpet lasts is to establish a maintenance plan.

Contact BSI for deep carpet cleaning services!

“Creativity takes courage.” – Henri Matisse

Maurice Davis is an artist. He loves to paint abstract work, whether its mixing water colors or oils or both. He created an art studio in his home, where he creates all of his artwork. He has a 2 year old grandson, who sometimes paints with him in the art room. He is very proud of his artwork and his grandson’s craft.

How long have you been a painter? – I started as a kid. I actually attended Art school, what is now known as Catholic High School. But it wasn’t until about 2 years ago that I started painting again. I had found some blank canvas, someone had threw out. I was immediately inspired to start painting and I’ve been loving it since.

Why Paint? – Painting gives me a relaxing feeling. I can be myself. I can wake up 3 am and will begin painting. I’m really inspired by the colors and how they blend. I just love doing it.

Techniques? – I like the “blow paint” technique. You place colors in the center of the canvas and use a blow dryer to blow the paint. The painting turns out whatever way the colors run (blow). Sometimes I use a ruler to make my own lines. I also like to mix water paints and oil paints together, but of course they don’t dry together at all.

What is your goal with this craft? – My goal is to have an art show of my collections in November or December this year. All of my paintings that will be on showcase have their own frames. I go to thrift stores and flea markets and buy used frames. I then take them home, re-varnish and fix the frames to uses for my paintings. I’ve noticed a lot of my paintings sell fast, so I look forward to my exhibit.

If you have a passion for painting, you should do it. The colors run their own course. Nothing brings me more joy than painting... I love painting!

Thanks Maurice for sharing your gifts.
